v.500 lite, v.500, v.500 dual, v.600, v.602, v.605,  
v.422 and v.425

## Overview

Mediacenters TVIP (STB) are designed to play IPTV (Digital television over IP) with standard definition (SD) and high definition (HD) resolutions.

There is an USB port that allows connection of additional devices such as keyboard, mouse, external hard drive, etc.

Slot for MicroSD card greatly extends the capabilities of the Mediacenter.

Mediacenter allows to playback video from external hard drives, USB-flash drives, MicroSD memory cards, as well as from shared network folders on a PC.

The recording function will keep your favorite TV translations for later viewing. Scheduled recording function makes Mediacenter one of the most functional. Parental control can block certain channels from unauthorized viewing with a password.

## Mediacenter settings

The manufacturer recommends an end consumer to setup and connect the Mediacenter exclusively with the help of technical specialists of the sellers' company for optimal and safe use of all TVIP Mediacenter's functions.

## Important

When unpacking the product, you must handle it with care, do not drop, shake and prevent from other impact.

The product is designed to be placed on plane surface horizontally. Do not place the product on a slippery surface, on the place where the product may vibrate, fall and be damaged the way that annuls the warranty.

Do not place the product on the surface which may be heated, for example, on video player or amplifier, and do not install anything on top surface of the product. Do not cover the product.

The product should be used with the power adapter supplied by the manufacturer only. The power supply is equipped with a plug that is designed for power outlets in a country of Mediacenter use. If you need to connect the product in another country or region, with other parameters of electric power, the power supply, approved for use in other areas should be obtained from the media center's manufacturer. During operation the external power supply is heated. If the external power supply unit gets hot, immediately unplug the product and contact your supplier for a replacement.

When using products for viewing plasma screens, do not put the picture on pause for more than 5 minutes, it can lead to "burnout" of pixels on the screen. This is not a defect in the product, but the design features of plasma screens. The manufacturer is not liable for any damage to TV due to such reasons.

## Connecting to TV

Use HDMI cable to connect the Mediacenter to your TV for the best possible video and audio quality.

Connect IR-receiver to operate from the remote controller.

Also you can use MicroSD memory card and connect the external device through USB port.

WiFi is available not for all models, details on the website and in the catalog.
